TEACHING

Johns Hopkins University
Role: Instructor Spring 2018
Course: Machine Learning: Linguistic and Sequence Modeling
Co-Instructor: Jason Eisner
I co-developed a new course in advanced machine learning—mostly structured prediction—with natural language processing as the primary application. We touched on a wide variety of subjects: Bayesian non-parametrics, approximate inference and deep learning.

Johns Hopkins University
Role: Teaching Assistant — Fall 2016
Course: Machine Learning (600.475)
Professor: Mark Dredze
I held discussion sessions with students to prepare them for homework problem sets.

Johns Hopkins University
Role: Teaching Assistant — Spring 2014
Course: Automata and Computation Theory (600.271)
Professor: Stephen Checkoway
I managed three course assistants and held weekly office hours.

Johns Hopkins University
Role: Teaching Assistant — Fall 2013
Course: Natural Language Processing (600.465)
Professor: Jason Eisner
I led weekly discussion sections to cement concepts and improve problem solving skills. I supervised three course assistants in grading the assignments.
